text-indent
text-align

margin (all | *top right bottom left*)
margin-*top* / *-right* / *-bottom* / *-left*
padding (all | *top right bottom left*)
padding-*top* / *-right* / *-bottom* / *-left*
border *width style color*
border-width (all | *top right bottom left*)
border-style (none | dotted | dashed | solid | double | …)
border-color
border-*top* / *-right* / *-bottom* / *-left*
border-*top-width* / *-top-style* / *-top-color* / *-right-width* / …
outline *width style color*

width
min-width, max-width
height
min-height, max-height
box-sizing (content-box | border-box)
overflow (visible | hidden | scroll | auto)

display (inline | block | inline-block | flex | grid | none | …)
visibility (visible | hidden)
position (static | absolute | fixed | relative | sticky)
top, **right**, **bottom**, **left**
float (left | right | none)
clear (left | right | both | none)
flex …
grid …
columns …

background-color
background-*image* / *-position* / *-repeat* / *-size* / …
background (…)
opacity
transform (translate() | rotate() | …)

list-style, list-style-image, list-style-position, list-style-type

CSS Units

```
px
pt
em
rem
%
vw
vh
mm
calc( x + y | x - y | x * y | x / y )
var(--x)
```

```
!important
```

CSS colors

Hexadécimal
3 ou 6 caractères 0–F
00 = 0
33 = 51
66 = 102
99 = 153
CC = 204
FF = 255

```
#RRGGBB
#RGB
```
#123 =→ #112233

RGB / RGBA
3 Valeurs RVB 0–255, Opacité 0–1
```
rgb(241, 53, 122)
rgba(241, 53, 122, 0.5)
```

HSL / HSLA
Teinte (0–360), Saturation %, Luminosité %
```
hsl(338, 87%, 58%)
hsla(338, 87%, 58%, 0.5)
```

Nommées
```
beige, fuchsia, darkseagreen, …
```

Dégradés
option pour **background:**
(non pas **background-color:** *!)*
angle, couleur 1, couleur 2, …
```
background: linear-gradient( 45deg,
red, blue);
```

Fond image
```
background: url("file.jpg") no-repeat center center fixed;
background-size: cover;
```

CSS Selectors

```
tag
#id
.class
*            (wildcard / "tout")

x , y        (liste)
x y          (parent → descendant)
x > y        (parent → enfant directe)
x + y        (élément suivant)

[attribute]              (l'attribut existe)
[attribute="value"]      (la valeur précise est…)
[attribute*="value"]     (la valeur contient…)
```

```
:link
:active
:visited
:hover
```

```
:first-of-type
:last-of-type
:nth-of-type( … )
:only-of-type
```

```
:first-child      (très utile avec selecteur 'descendant')
:last-child
:nth-child( … )
:only-child
```

```
:not(selector)
```

```
::before         → content:" … ";
::after          → content:" … ";
```

```
::selection
::first-line
::first-letter
```

CSS At-rules

```
@font-face { … }
@media requête-média { … { … } }
@import "style.css";
@import url("style.css");
```
